

## Maintenance Chargehand Policy

*Policies and  
Responsibilities*

December 2014

**Purpose:**

This policy was formed in an attempt to clarify the principles to be used when assigning maintenance chargehands and create consistency across the Southern Interior Tolko mills.

**Scope:**

This policy applies to all Tolko mills operating within the Southern Interior Master Agreement.

**Policy:**

The use of chargehands are essential to successfully coordinate and communicate with the employees at our operation. They provide a key role in ensuring work is properly assigned, completed, and reported. In no terms is this policy designed or intended to change the purpose or work normally performed by a chargehand as practiced at the division. This policy is to be used for the purposes of assigning chargehands only.

*Principles:*

*The following guidelines are to be followed when designating chargehands:*

- *Chargehands should follow the crew they are assigned to.*
- *Chargehands should only be paid the premium when required to direct other employees.*
- *Maintenance chargehands are designated one per trade per shift unless additional chargehands are required for temporary projects in the department*

### RESPONSIBILITIES

Job Role	Responsibilities
Chargehand	<ul style="list-style-type: none"><li>• To perform the duties of a chargehand when designated.</li></ul>
